

# VICTORIA TERAN

Full Stack developer & Arquitect

## About me

Architect and passionate developer who ventured into the world of technology in early 2022. With a background in architecture, I discovered my love for programming and have been eager to learn ever since. Having spent a year living abroad, I honed my English skills and gained a valuable international perspective. Currently seeking my first role as a developer, I'm excited to contribute to innovative projects as a creative, problem solver and teamplayer.
